

New Facility

We're glad to announce that a new EIK facility is up and running. With its expansive space, the facility stores a wide range of spare parts, pontoons, buckets, long reach and other attachments. We can now shorten our lead time with ready stocks available for quick delivery.

With nice water features facing the building, the facility area has a modern feel to it, and provides a conducive place for employees to work and discuss matters productively.

In line with EIK's goal to continuously elevating both hardware (facilities & equipment) and skills set of employees to reward our customers with better products and services, every employee has equal opportunity for training and upgrading.

We work hard, we play hard.

This is the team that worked on the Cat6020B bucket from start to finished. Not the first time delivering bucket of this scale & size. Their dedication and pride that put into the product they have 'hand crafted' give them the sense of achievement and motivation to attain higher standard in the next product awaiting them.

The picture on the right is where the bucket going through precision line bore process to ensure the bucket pick-up brackets are bored to the required precision and tolerance.

For standard buckets produce in high volume, we invested in robotic welding system to ensure consistency, quality and productivity.

Our customers deserve the very best from EIK.

WE BUILD WITH PRIDE, YOU USE WITH TRUST.
