

Amphibious Excavators Are Coming to Town

The AM80 amphibious excavator featured above was working right in the center of a metropolis in Europe, in a popular park for family activities and relaxation for both locals and tourists. The lake in the park requires routine upkeep to maintain a conducive and habitable environment for wildlife to thrive. The work involved moving dredged material from different parts of the lake to build up the shore of an island and constructing a reed fringe. The amphibious excavator, fitted with supplementary pontoons, a spud system and a long reach boom, dredged material from the lake, accumulated it on a floating pontoon and moved it to the desired location for unloading. It is the only viable, yet cost-effective, solution for jobs where the machine is required to work on both land and water. Having pontoons that retract to give a smaller foot print under 3 metres wide makes it a breeze to transport through an urban city. Small, yet powerful enough for the job.

Amphibious machines working in cities and residential areas is becoming a common sight. Many customers have realized the versatility of such machines. Urgent work in urban areas can now be carried out simply and quickly, without the need for heavy equipment or complex solutions.

Next-Gen Cat Amphibious Excavator

We are currently embarking on a project to convert the next-gen Cat320 into an amphibious excavator. The newly launched Cat machine is gaining traction in the market and we thank our customer for giving us the opportunity to work on this new and exciting project. Our team is looking forward to test this new machine in the field.

EIK is progressively rolling out the full range of our newly improved, patented—amphibious undercarriages, incorporating new features and enhancements that continue to lead the market. Stay tuned for more updates.

EIK Charity Golf Tournament

The EIK One Heart, One Mind Charity Golf Tournament is now a signature annual event. An opportunity to make a difference to society, especially the less privileged. This was made possible with the overwhelming support of our like-minded associates and friends. Thank you for your generosity and active participation. Your selfless action have certainly touched and warmed the hearts of the beneficiaries.
