

## EX1900 Long Reach Boom

Customers have been emailing us requesting for more photos on the EX1900 we have recently delivered. Here is another one, courtesy of our customer. 😊

We are pleased to share that currently there is another EX1900 long reach boom in production. We shall further update in due course.

## New Product Introduction, AM60

Model AM60, another leading product designed to cater for the 4 – 5 ton class excavator segment. This machine size is very much in demand for cleaning small canals and waterways. The entire machine can be easily haul around in cities, as well as tight and narrow rural access path.

This very first unit will be delivered to a customer in the South East Asia region.

May seem to be small in size but certainly big on productivity.

## Inventories Now Available Online

We have updated our website to include inventories in stock for immediate delivery. You can click onto the “Available Inventories” tap to check up what you need is in stock.

**WE BUILD WITH PRIDE, YOU USE WITH TRUST.**

Trash clogging on waterways has always been a major concerns in many cities in the world, triggering floods and hosts of environmental issues resulting in serious economic lost. The challenge these cities faced is there isn't any available solution in the past.

The amphibious excavator has proven itself time over time on it's effectiveness in tackling this messy problem that has been bothering local governor and city dwellers. These photos show the before and after the cleaning exercise.

It's indeed Heaven and Hell !
