

"An Excavator That Fear No Terrain"

EIK has upgraded numerous features to the highly popular AM140 amphibious undercarriage to further distant ourselves from competitors.

- Pontoon is 100% stronger and yet lighter.
- Increase floating capacity.
- Piston style track adjustment mechanism.
- Main pontoon can be retracted down to 3.5m width foot print. No escort is required in US and Europe.
- Improved roller and bushing design to increase durability.

Customers will be pleased to know that the price remain unchanged despite these upgrades.

100th Anniversary Kin Cho Hong Gala Dinner

A wonderful night on 4th August 2018, where the celebration for 100th Anniversary of Selangor & Federal Territory of Kuala Lumpur Kin Cho Hong was held Kuala Lumpur.

WE BUILD WITH PRIDE, YOU USE WITH TRUST.

EX2500 Standard Boom

This enormous EX2500 Hitachi standard boom is ready for delivery to a mining customer. EIK are known for building high performance amphibious excavator and quality attachments for various makes and models of earth moving equipment. With over a decade of good track record, we have earned the trust of the mining customers. We continue to invest heavily in state-of-the-art equipment and automation to reward our customers with quality products at unparalleled value. The boom was completed in 3 month within the aggressive timeline given by the customer. Exceeding customer expectations has always been our staunch guiding value.

Sixteen operators eagerly getting their hand ready to operate the newly minted Liebherr 934 amphibious excavator. Safety induction and advance operating techniques training is mandatory, and were conducted by EIK trainer. This is the first time the site has been using Liebherr amphibious excavator, not one but six machines. With 16 operators, you need to be patient 😊.
